

Pursue your retirement income dreams with Income 150+ SE fixed index annuity

With Income 150+ fixed index annuity (FIA), you can grow your Withdrawal Base by steady, predictable amounts, called Income Boosts^{1,2}, in the early years – no need to wait decades to see your money grow. And if you wait to activate income, Income 150+ FIA provides additional growth to the Withdrawal Base at the start of Year 10. Regardless of the interest crediting strategy you select, you can't lose money due to poor market performance with Income 150+ FIA.

Here's how it works:

¹ Income Boosts, also known as Deferral Bonuses, are based on premium paid, adjusted for withdrawals, and credited to the Withdrawal Base, reduced for any withdrawal in proportion to the reduction in contract value.

² Each boost value assumes income has not started and withdrawals have not been made. The Withdrawal Base and Income Boosts are not available on cash surrender or as death benefits.

³ This amount is hypothetical and is shown for illustration only.

The Guaranteed Lifetime Withdrawal Benefit is included at issue for an annual charge of 1.05% of the Withdrawal Base at the end of each contract year. The Withdrawal Base is a unique value, separate from contract value, and is not available for surrender or as a death benefit.

Deferral Bonuses are only available prior to income activation, referred to as the Activation Date in the contract. Withdrawals reduce income growth when taken prior to income activation.

Year 10 Deferral Bonus is 150% of interest earned on the contract value, reduced proportionately for any withdrawals, during years one through nine.
